- Recommended adhesive type
- Alternative adhesive type for a weaker binding

- 1 One-component gluing, possible from 2 sheets onward (double set)
- 2 Two-components gluing, possible from 3 sheets onwards (triple set)
- 3 With hard papers as front sheet

FF 55 enables a postponed glueing after cutting the edges; the sets can be separated from each other by knocking them in small blocks onto the table or by manual fanning with both hands after drying time of 35 - 40 minutes.
