

Available with card bins for faster finishing or conveyor option for flexibility.

The response at IPEX 2002 to the new Rollem business card cutting system was the best of all our equipment on show.

Included in the specification of the IPEX 2002 system is:

- From A5 up to A3 sheet size
- 1.5mm bleed in both directions between cards
- Careful, but high speed, cutting of fully laminated card stock
- Production of up to 75,000 quality finished business cards per hour
- Easily adjusted to differing card sizes
- The highest cut-quality with no variability between sheets.

New Rollem Business Card Systems

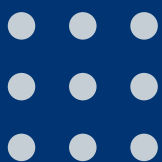

With a change of units, the business card slitter can be reconfigured to run any Rollem perfining, scoring and slitting unit, giving the flexibility of not just business card finishing, but a full range of finishing work in low to high batch sizes.
