

# Rollem ETR System

The most economical way to slit, perf and score.

**Rollem**

# The ETR Die-Score System

The ETR creates crisp slits, razor sharp cuts, and superb scores - flawlessly with 100% precision, but that's what you'd expect, it's a Rollem. With over 72 years engineering experience the name is synonymous with high quality, speed and accuracy to this day.

## 3 by 1

One operator can confidently perform exact single pass placement of scores, perms and slits, and within seconds make drop-of-a-hat adjustments to redeem inconsistent press sheets. This higher level of quality control lets you confidently process challenging jobs.

## Save Money

Faster, more profitable, more versatile, the ETR Score System has a single pass capability, able to process 15,000 sheets per hour. It perms, scores and slits 5 times faster than conventional methods when combined with existing folders. It can also be

configured to execute right angle processing and Rollem provide you with a huge range of speciality heads to complement your investment and advance your supply of a higher quality finished product to the end user.

## Customise

For total flexibility, let your ETR process brochures, inlay cards, double gate folded literature and cross over designs. It'll provide perfect performance on stocks ranging from 45 gsm to 750 micron board. The ETR, a machine designed to exceed your expectations

The die is cast. There's only one choice.
