

Rollem Rollaway

The most profitable and accurate way to perf,
score, slit and semi-slit.

Rollem

The Rollaway
saves time, saves
labour, does a
better job - faster

We've got the solution to your space, time and labour problems all completely solved ... introducing a Rollem success story, 'The Rollaway'.

The Rollem Rollaway

The Rollaway gives a tremendous field of application. Cost savings abound with operators' time reductions and machine investments. The Rollaway is a fully mobile and automatic machine that has been specially designed, and is ideally suited in offering added value printing benefits to your clients. You can perf, automatic strike perf, score, slit, strike slit and semi-slit all at the touch of a button and with high Rollem accuracy. It'll give you that all important edge in increased business profitability.

Time

The Rollaway has been engineered to cope with the rigours of speed demands - with your complete overall control, saving valuable operators' time plus the added benefit of no double stock handling.

Independent and Versatile

It can be used as an independent unit complete for manual feeding. The Rollaway perms, creases and slits direct from the press or other machine delivery in either of two directions.

High accuracy comes as standard backed by the acclaimed Rollem name for excellence.

The fully mobile and automatic machine gives a tremendous field of application.

The Rollaway - a mobile fully automatic perforator, creaser and slitter that's flexible in every direction, whichever way you look at it. It's a winning decision.

Labour

Simply, the Rollaway does a better job faster. If you perf in quantity, you cannot afford to be without this machine, you owe it to yourself and your company's profits.

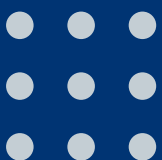

Space Saving

The Rollaway has been designed specifically for portability and can easily be used as the perfect companion to complement your existing machinery investment - no matter what position they're placed in or type of flooring you've got - the Rollaway is fully height adjustable to suit all applications. What's more, there's an extra benefit of saving even more valuable space. Normally the stock would be awaiting perf, creasing and/or slitting - not anymore with the Rollaway, it allows all three operations to be done simultaneously or singularly on a wide variety of printed stock.

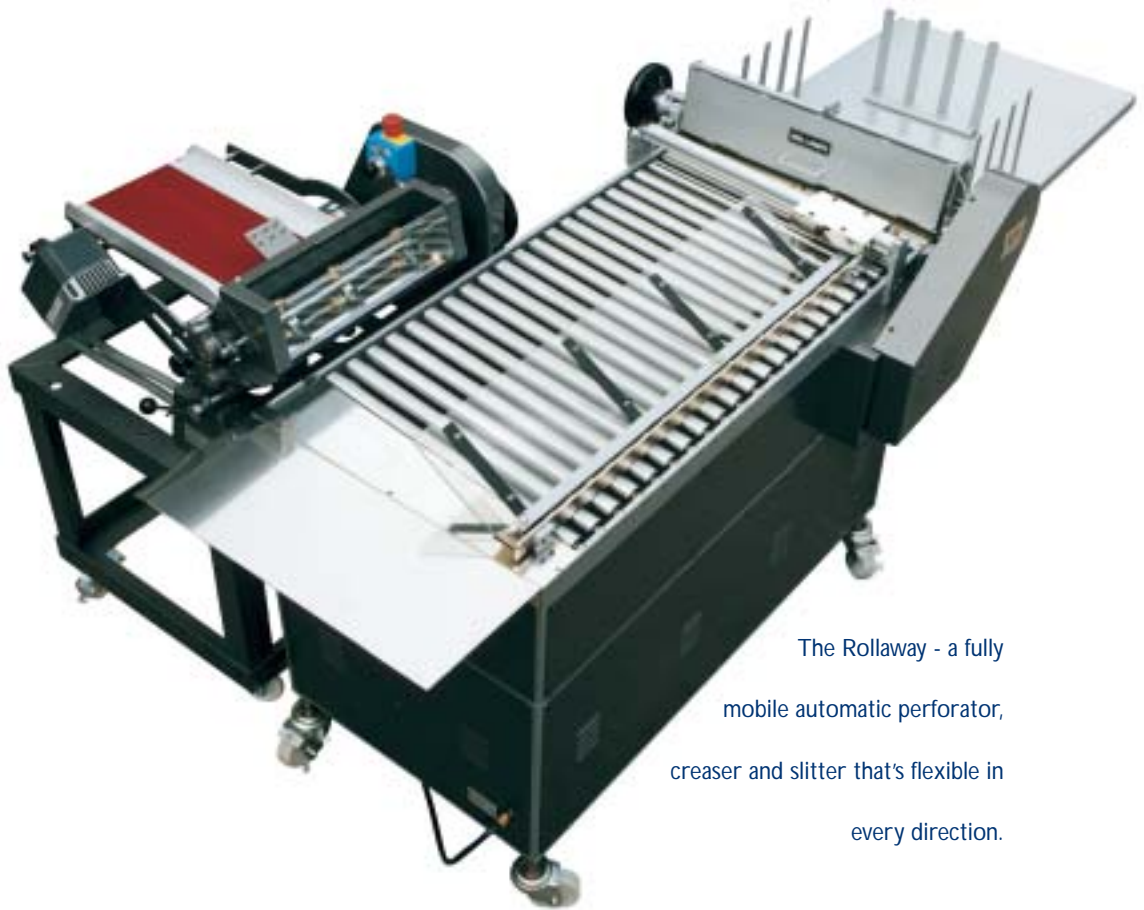

Changing from one press to another in a matter of minutes.

Rollaway the perfect mobile finish

TECHNICAL SPECIFICATION

MODEL	Machine Size	Length (mm)	Width (mm)	Height (mm)	Weight (kg)	Min Sheet Width (mm)	Min Sheet Length (mm)	Max Sheet Width (mm)	Max Sheet Length (mm)	Min Sheet Weight (g/sm)	Max Sheet Weight (g/sm)	Power Supply (volts)	Max Speed A4 (s/hr)
