

## AMS MAILBAG POLYWRAPPING SYSTEM

### Improves the efficiency, security and presentation of your mailing process

#### What Does It Do?

The AMS Mailbag system will automatically wrap polythene film around a magazine, brochure or catalogue and seal it – all in one quick operation! It is a cost effective, fast and efficient way to enclose and mail direct marketing material, without the use of an envelope.

Up to 1300 mail packs can be processed per hour and the Mailbag will automatically adjust the cut to the length of the mailing piece without the need to manually adjust the settings. The Mailbag, which is easy and safe to operate, uses low cost roll-fed poly and can wrap items up to 250mm wide including A4 and A5 packs.

#### How Does It Work?

The Mailbag uses one single wound roll of clear, obscure or pre-printed poly up to a maximum thickness of 65 microns, fed on a motor driven roller. The Mailbag folds the poly film to form a sealed pack which contains the mailing piece. When the process is complete the pack is ejected automatically into the catcher tray.

#### Why Do I Need It?

The AMS Mailbag system is a fast and efficient way to enclose and mail magazines, brochures or catalogues. It's also cheaper and lighter than a paper envelope so will save you money when weight is an issue, not just on the cost of an envelope but also on the postage. From an aesthetic and practical point of view clear poly films allow marketers designs to show through, encouraging readers to open the pack and enjoy the contents.

The Mailbag also includes a number of low cost options to suit your needs such as an obscure poly film kit, a print registration kit and a powered conveyor unit.

#### Key Features:

- Improves the efficiency, security and presentation of your mailing process
- Ideal for mailing magazines, brochures and catalogues
- Wrap up to 1300 packs per hour (A4)
- Can wrap items up to 250mm in width
- Can be used with clear, obscure or pre-printed poly films
- Adjusts for product length automatically
- Ten job profiles can be pre-saved
- Integrated product and batch counting included

## OPTIONAL EXTRAS (CAN BE ADDED AFTER INSTALLATION)

### Clear, Obscure or Pre-printed Poly Film

AMS can supply clear, obscure or full colour pre-printed poly films of various sizes so your logo and branding can be clearly seen. There are also degradable and bio-degradable options available to minimise environmental impacts.

### Obscure Poly Film Kit

The Obscure poly film Kit can be installed for using obscure poly film.

### Print Registration Kit

The Print Registration Kit can be installed if you wish to use pre-printed films with a register/tick mark, ensuring the wrap is cut in the correct place each & every time.

### Exit Conveyor

AMS can supply a silicon belted, heavy duty powered conveyor to raise the wrapped pack back to workbench height. (It is also possible to add on a mail bag support bracket so the mail pack can drop straight into a mail bag).

## SPECIFICATIONS

Speed	Up to 1300 A4 size mail-pieces per hour – Speeds are dependant upon applications and operators.
Material Size	Max up to (W)250mm (L)360mm
Material Thickness	Max up to 20mm
Max Film Roll	540mm Width - 250mm Diameter
Wrapping Film Types	PE, HDPE, Polyolefin, Polyethylene and many other types of poly film including bio-degradable
Wrapping Film Thickness	Up to 65 microns - Minimum Thickness By Test

## TECHNICAL INFORMATION

Machine Dimensions	(W)835mm x (D)600mm x (H)1050mm
Machine Weight	130Kgs
Power	230Vac 50-60Hz
Sealing	Independent sealing bars, adjustable by time and temperature
Safety	Cover with interlocking switch

## Why Choose An AMS Mailbag Polywrapping System?

AMS is one of the UK's leading suppliers of mailroom equipment. As well as having a dedicated team of knowledgeable experts to offer advice and bespoke solutions to suit your mailing needs, we have a well-trained customer support team and highly skilled team of field engineers to support you after your purchase.

This reliable and efficient after-care support service is provided to ensure you get the most out of your purchase. We also offer a comprehensive range of technical support and service packages that cover both equipment and software. Our maintenance packages are an economical way to maximise performance and the longevity of your machine, overall resulting in peace of mind.
