

# UCHIDA COLLATORS

There are other good collators on the market, but none provide the combination of price and performance you get with the *Uchida* range from *Morgana*. Fast and versatile, *Uchida* collators are packed with features that save time and money.

The *Uchida UC-1000* is a ten bin collator which will handle sheet sizes in excess of SRA3 and below A5 and will run at speeds up to a hugely impressive 3600 sets per hour.

Fully automatic miss and double detectors ensure that every set is absolutely accurate, The *UC-1000* also has a unique criss-cross

Uchida UC 1000 collator with Nagel bookletmaker

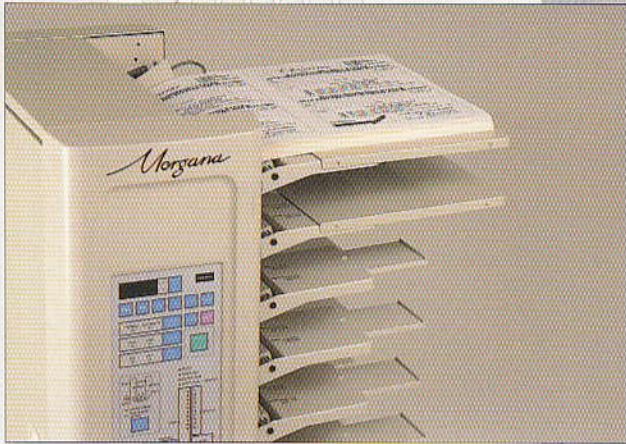

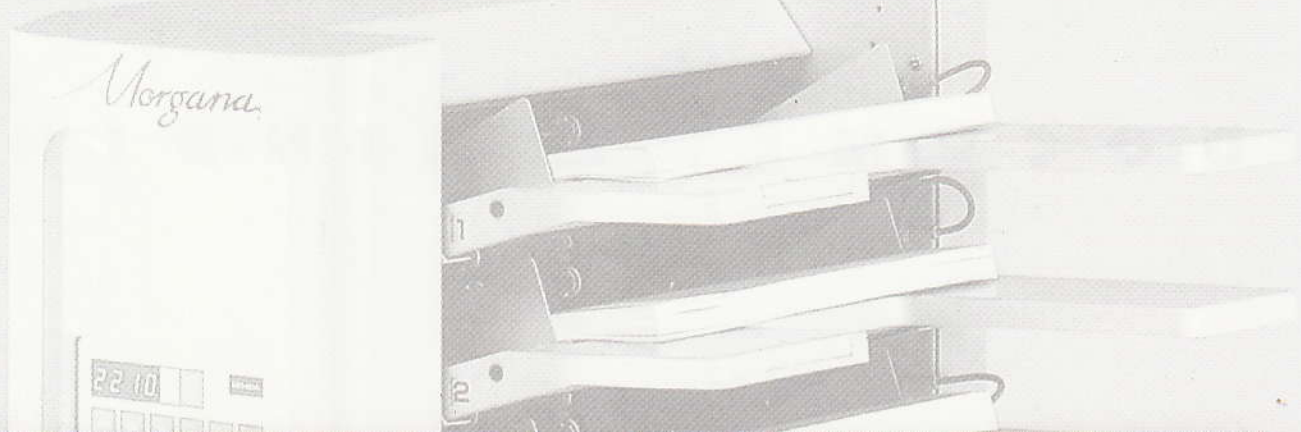

Uchida UC 800 collator

stacker and both bin programming and bin linking are standard features, as is automatic cover inserting. Counting and batching are also standard features.

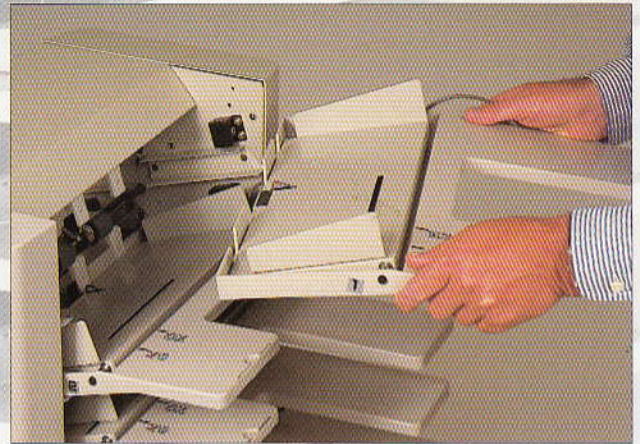

The *Morgana Jogger* is available as an option for users who want to collate and 'knock up' SRA3 carbonless paper.

The *Uchida UC-800* is a smaller, 8-bin version which shares advanced features such as criss-cross stacking and trays that raise automatically. An optional stapler and punch can also be provided. *Uchida* collators are compatible with most floor standing bookletmakers including, of course, the *Nagel* range.

The UC1000 will easily handle SRA3 paper.

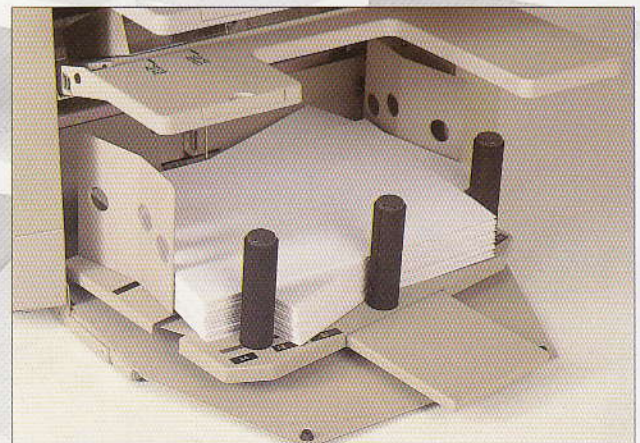

Removable feed trays enable easy access.

Uchida UC 1000 with jogger.

Paper capacity. Both UC800 and UC1000 provide generous paper capacity.

Cross stacker. Unique criss-cross stacking gives perfect separation of sets.
